

## **Operational Services**

### **Pandemic Preparedness**

The Board of Control recognizes that SASED will play an essential role along with member districts, the local health department and emergency management agencies in protecting the public's health and safety if an influenza pandemic occurs. A pandemic influenza is a worldwide outbreak of a virus for which there is little or no natural immunity and no vaccine; it spreads quickly to people who have not been previously exposed to the new virus.

To prepare the SASED community for a pandemic, the Executive Director or designee shall: (1) learn and understand the roles that the federal, State, and local government would play in an epidemic; (2) in collaboration with our member districts form a pandemic planning team consisting of appropriate SASED personnel and community members to identify priorities and oversee the development and implementation of a comprehensive pandemic influenza action plan; and (3) build awareness of the final plan among staff, students, and community.

### **Emergency School Closing**

In the case of a pandemic, any decision for an emergency closing will be made by the Executive Director in consultation with member districts and, if necessary, at the direction of SASED's local health department, emergency management agencies, and Regional Office of Education.
